mm / in

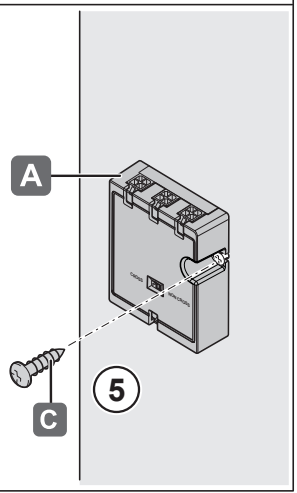

Unplug system from main power before assembling components

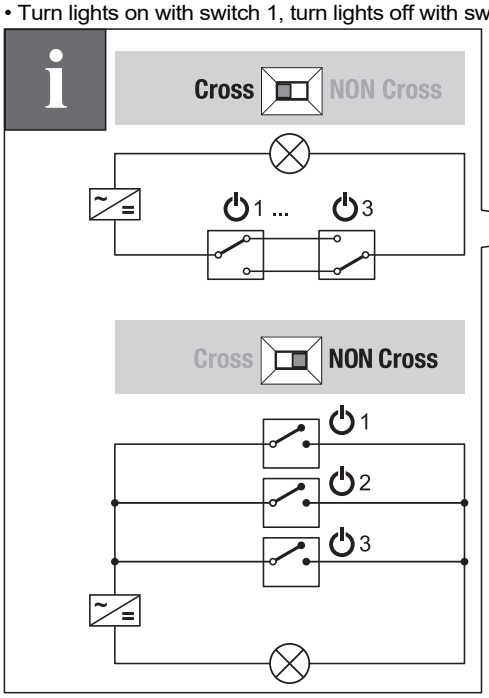

1 PH 2 Secure device with adhesive tape and screw

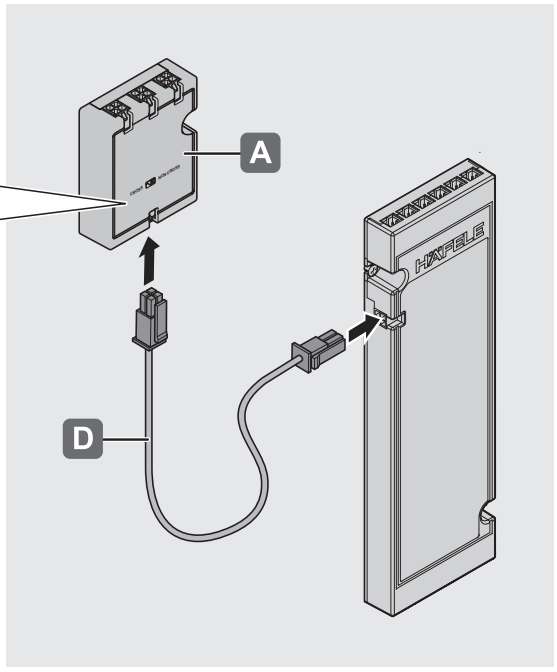

2

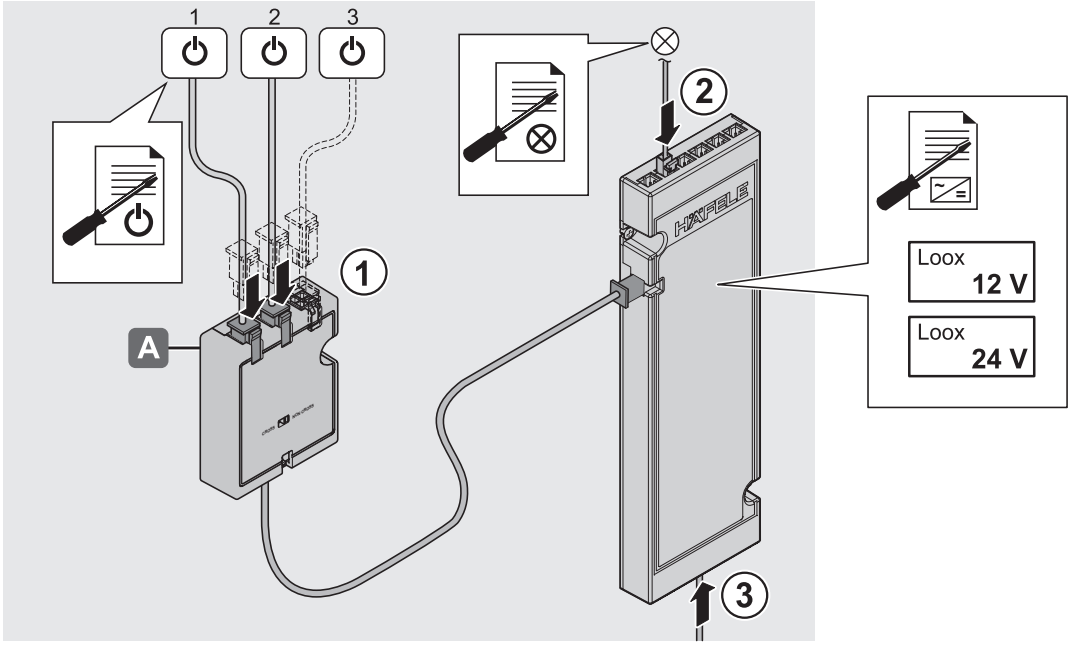

Cross Function:
• Each switch activation changes the state of the connected lights
Function:
• This function is like true 3-way or 4-way switching.
• Turn lights on with switch 1, turn lights off with switch 2, turn lights on with switch 3, or with the same switch.

3

NON Cross Function:
• All switch ports control all power outputs
• Dimmer switches cannot be used on this function
Function:
• Ideal for double door control of lights in a single cabinet
• Ex.: open door 1 and lights illuminate, open door 2 and lights remain illuminated. Both doors must be closed to turn the lights off.
